

This hot new sex toy provides more “cushion for the pushin’”...literally.

Perfect Fit Brand has launched the Bumper™, the first-ever adult product that cushions deep thrusts during intercourse, providing an opportunity for more passionate sex without restraint.

Receiving Partners who express discomfort during intercourse with a partner may find pleasure in the Bumper™'s ability to make sex more enjoyable within their comfort zone. Penetrating Partners will still have the feeling of full insertion and intimate contact with their partner without having to hold back. For women, this also acts as a sexual health tool to lessen the chances of a bruised cervix.

The Bumper™ is a system of two parts: The Bumper™ Thrust Buffer™ and the Donut Buffer. Either one can be used independently or together to create a thick and protective cushion for when the thrusts get deep. Made of ultra-soft SilaSkin material, the Bumper™ is also irresistibly soft and comfortable.

The Bumper™ acts like a cushion between two partners to absorb some of the bumping and provide the sensation of maximum depth for the penis.

The Bumper™ fits around the penis and is held in place by the testicles. The Bumper™ is also designed to be adjustable so users can add more cushions—the Donut Buffers—to suit their depth requirement. Now sexual partners can try avoided positions with new confidence and pleasure.
